

EFFICIENCY IN AGRICULTURAL SYSTEMS

Data capturing could pose a significant expense for companies to maintain records and switch between software programs – a reality of the new world we live in.

The APPSolve Agri financial system integration application limits capturing any unnecessary data twice by the application user.

This application is used in conjunction with any of the other applications held by APPSolve Agri and allows the user to export data through the application to integrate it into another system used by the company, for example, a financial package like SAGE Pastel.

This ensures that time is used efficiently and that data is not captured multiple times.

In addition to extracting data from this application, it is also possible to import data from other software systems or excel sheets into this application according to the unique specifications.

This application limits the capturing of any unnecessary data twice by the application user

Oracle Global Excellence Award for sustainability innovation

AWARDS

Oracle awarded AfricaTradeApp (now known as APPSolve Agri) its 2015 and 2016 Global Excellence Award for sustainability innovation.

This is international recognition of the application's value to the economic and social upliftment of the local communities in these countries.

APPSolve Agri
Tracking Product and Profit

TRACKING PRODUCT AND PROFIT

APPSolve Agri specialises in agricultural system development and implementation throughout the value chain

FINANCIAL SYSTEM INTEGRATION APPLICATION

ABOUT APPSOLVE AGRI

APPSolve Agri aims to provide a suitable software system to their clients that accommodate all the agricultural environment's general and specific needs. It tracks products from the farmers through the value chain to the final consumer.

The APPSolve Agri application provides an online platform to store and analyse the data and upload documents of any type for any stakeholder, business and/or farming operation in terms of production, loans, transportation, storage, and sales.

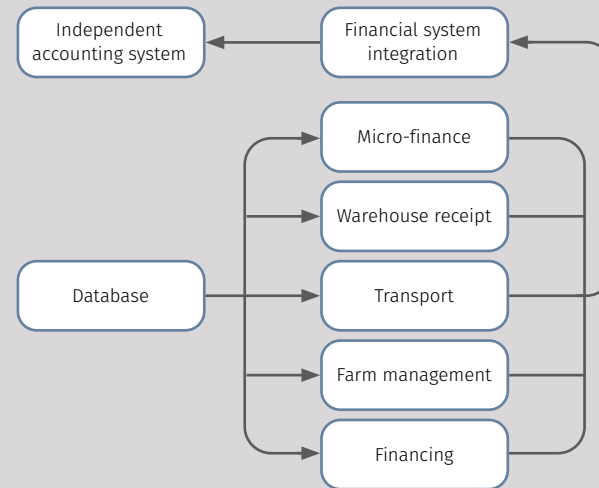

This application can also integrate with most other software systems, such as financial packages, ensuring no double capturing of data.

The system is integrated with financial packages like SAGE Pastel

BENEFITS OF THE FINANCIAL SYSTEM INTEGRATION APPLICATION

This application works in conjunction with all other applications by APPSolve Agri to integrate with other systems:

- Micro-financing
- Warehouse receipt
- Transport
- Farm management
- Financing

The financial system integration application allows the user to import and export data from/to other software programs.

This ensures that data is captured only once and optimises the value of time.

Integration with systems already used by companies ensures the correctness of information in all systems and limits human errors.

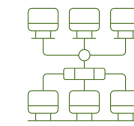

The system is integrated with financial packages like SAGE Pastel; therefore, any transactions processed on this application can easily be imported into Pastel.

BENEFITS OF APPSOLVE AGRI'S SOFTWARE SYSTEM

ORACLE DATABASE, APEX FRONT-END

World-class software is used to develop an easy-to-use system. The system is built on the Oracle database. Oracle Application Express (APEX) is used as the development platform for the front-end. Jasper iReports is used for publishing PDF documents.

MULTIPLE USERS AND ACCESS

Multiple users can access the system at any time, each with their unique login details. Unique functionalities are assigned to each specific user role.

HELPDESK

Helpdesk with our team of professionals is available during office hours via telephone, e-mail, WhatsApp or any video conferencing solution platform. On-site training sessions for groups/individual clients.
