

AN INTEGRATED TRANSPORT SOLUTION

The transport application is used in conjunction with the warehouse receipt system. It allows for the tracking and tracing of transport between warehouses, farms, factories and any other relevant dispatch or drop-off point.

Multiple dispatched and deliveries allow the user to take advantage of the total capacity of their trucks, ensuring efficiency and accuracy.

This application allows the user to see the dispatch and arrival times of the loads and any losses that might occur in the transportation process. Secure dispatch and receipt sign-off by the respective managers in charge.

Reporting to summarise the efficiency and timeliness of product transportation between farmers and millers is made possible and easy to analyse.

Any costs associated with transport is captured and verified by the receiving warehouse

Oracle Global Excellence Award for sustainability innovation

AWARDS

Oracle awarded AfricaTradeApp (now known as APPSolve Agri) its 2015 and 2016 Global Excellence Award for sustainability innovation.

This is international recognition of the application's value to the economic and social upliftment of the local communities in these countries.

APPSolve Agri
Tracking Product and Profit

TRACKING PRODUCT AND PROFIT

APPSolve Agri specialises in agricultural system development and implementation throughout the value chain

TRANSPORT APPLICATION

ABOUT APPSOLVE AGRI

APPSolve Agri aims to provide a suitable software system to their clients that accommodate all the agricultural environment's general and specific needs. It tracks products from the farmers through the value chain to the final consumer.

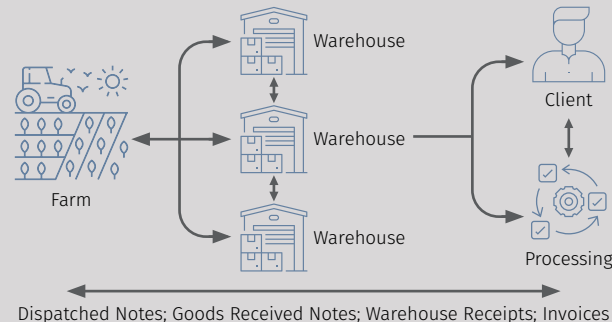

The APPSolve Agri application provides an online platform to store and analyse the data and upload documents of any type for any stakeholder, business and/or farming operation in terms of production, loans, transportation, storage, and sales.

This application can also integrate with most other software systems, such as financial packages, ensuring no double capturing of data.

Additional loads can be added to a dispatch note if a truck loads from more than one location

COMPONENTS OF THE TRANSPORT APPLICATION

- Accompanied by Database application
 - Load all stakeholders and information
 - Contact details
 - Identification
 - Addresses
 - Documentation
 - Banking details
 - Link stakeholders for effective reporting
- Accompanied by the warehouse receipt system, this application would hold all the advantages of the warehouse receipt application, with some added benefits of tracking and tracing products as they move through the commodity supply chain
- Warehouses and all other receiving and dispatching locations are pre-loaded on the system
- Dispatch notes are generated on the system from the point of original dispatch
- Truck and driver information is captured on the system and reflected on the dispatch note to create accountability for the transported products
- Any costs associated with transport is captured and verified by the receiving warehouse
- Additional loads can be added to a dispatch note if a truck loads from more than one location
- One dispatch note can accommodate multiple loads to be delivered and various destinations
- Warehouse managers can see in real-time if any loads are dispatched to their warehouse and the time and place the dispatch has occurred
- Warehouse of origin can see the time and date the products are delivered to the destination site
- In-depth reports can be generated on transport companies, drivers and trucks

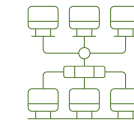

BENEFITS OF APPSOLVE AGRI'S SOFTWARE SYSTEM

ORACLE DATABASE, APEX FRONT-END

World-class software is used to develop an easy-to-use system. The system is built on the Oracle database. Oracle Application Express (APEX) is used as the development platform for the front-end. Jasper iReports is used for publishing PDF documents.

MULTIPLE USERS AND ACCESS

Multiple users can access the system at any time, each with their unique login details. Unique functionalities are assigned to each specific user role.

HELPDESK

Helpdesk with our team of professionals is available during office hours via telephone, e-mail, WhatsApp or any video conferencing solution platform. On-site training sessions for groups/individual clients.
