

SUSTAINABLE WAREHOUSE SOLUTIONS

Warehouse receipts systems are very powerful tools for developing and ensuring the success of multiple businesses, but managing warehouse receipts movements, stock levels, storage costs, and collateral financing can sometimes seem intimidating.

The warehouse receipt application makes provision for all these aspects and more.

This application is specially designed to allow multiple users and stakeholders to access the system, enabling them to do their part in this multifunctional system. The warehouse receipt allows the user to create documentation online from anywhere, creating a legal title e-receipt on the database and printing a PDF hard copy for the stakeholders.

Using the warehouse receipt application will enable the users to have access to real-time information on stock levels, invoicing, and collateral financing of stock virtually anywhere at any time.

The system allows for traceability throughout the process for all the stakeholders using the APPSolve Agri software system.

The various reporting capabilities of the system allows for proactive responses to changes in the market to minimize any possible risks. In contrast, the system's integration capabilities ensure that minimal capturing is necessary.

The system's reporting capabilities allows for proactive responses to changes

Oracle Global Excellence Award for sustainability innovation

AWARDS

Oracle awarded AfricaTradeApp (now known as APPSolve Agri) its 2015 and 2016 Global Excellence Award for sustainability innovation.

This is international recognition of the application's value to the economic and social upliftment of the local communities in these countries.

APPSolve Agri
Tracking Product and Profit

TRACKING PRODUCT AND PROFIT

APPSolve Agri specialises in agricultural system development and implementation throughout the value chain

WAREHOUSE RECEIPT APPLICATION

ABOUT APPSOLVE AGRI

APPSolve Agri aims to provide a suitable software system to their clients that accommodate all the agricultural environment's general and specific needs. It tracks products from the farmers through the value chain to the final consumer.

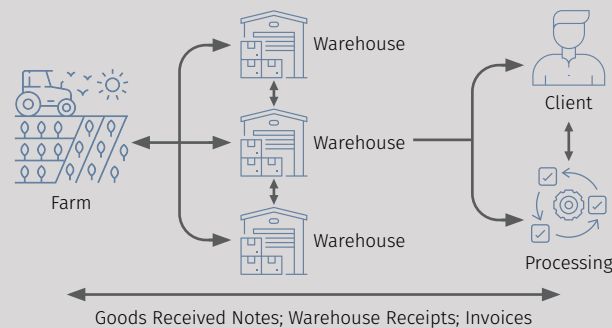

The APPSolve Agri application provides an online platform to store and analyse the data and upload documents of any type for any stakeholder, business and/or farming operation in terms of production, loans, transportation, storage, and sales.

This application can also integrate with most other software systems, such as financial packages, ensuring no double capturing of data.

Traceability through all stakeholders using the system

COMPONENTS OF THE WAREHOUSE RECEIPT APPLICATION

- Accompanied by Database application
 - Load all stakeholders and information
 - Contact details
 - Identification
 - Addresses
 - Documentation
 - Banking details
 - Link stakeholders for effective reporting
- Products are pre-loaded on the system according to grading, chemicals used, etc., according to the company requirements with the reference price
- The system makes provision for all aspects of receiving and dispatching products:
 - Generate goods received notes
 - Generate warehouse receipt as proof of ownership
 - Sends finance requests to appropriate stakeholders (where relevant)
 - Calculation of fees, storage costs and interest per warehouse, per product, per client
 - Split and merge warehouse receipts
 - Sell warehouse receipts and products
 - Generate invoice per entity with required company information of both parties
- All documentation and photos can be loaded on the system for reference at any point, for example, chemicals used, invoices, certification
- Traceability through all stakeholders using the system
- Detail reporting of product flow at all times

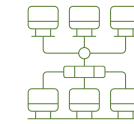

BENEFITS OF APPSOLVE AGRI'S SOFTWARE SYSTEM

ORACLE DATABASE, APEX FRONT-END

World-class software is used to develop an easy-to-use system. The system is built on the Oracle database. Oracle Application Express (APEX) is used as the development platform for the front-end. Jasper iReports is used for publishing PDF documents.

MULTIPLE USERS AND ACCESS

Multiple users can access the system at any time, each with their unique login details. Unique functionalities are assigned to each specific user role.

HELPDESK

Helpdesk with our team of professionals is available during office hours via telephone, e-mail, WhatsApp or any video conferencing solution platform. On-site training sessions for groups/individual clients.
